

Passionate software developer specializing in creating dynamic, user-centric web applications with expertise in JavaScript, React and modern frameworks.

PROJECTS

- Real Estate Web Application

**Description-** Developed dynamic, responsive web app with detailed listings of properties. It utilizes idle detection to display promotional messages. The application also supports infinite scrolling and showcases detailed property information with interactive elements like maps and offers.

**Technologies:** HTML, CSS, JavaScript, React, Mirage Js

**Project Link-** <https://abodehome.netlify.app/>
- Trivia Quiz

**Description-** Developed dynamic, responsive quiz application featuring interactive quizzes and a countdown timer. Implemented custom routing and category navigation for a seamless user experience. Integrated and optimized quiz data handling and front-end functionalities.

**Technologies:** HTML, CSS, JavaScript

**Project Link-** <https://quizappbymayankverma.netlify.app/>
- Notes Taking App

**Description-** Developed dynamic, responsive web app for managing notes, integrating Quill for rich text editing and Fabric.js for drawing. Notes are stored in local storage with functionalities to add, edit, delete, and share. Ensured an intuitive and seamless user experience across devices.

**Technologies:** HTML, CSS, JavaScript
