✉ Mayankverma.dev@gmail.com 🔗 [GitHub](#)

Frontend Engineer with 3+ years of experience delivering performant, scalable web apps using React, TypeScript, and modern tooling. Proven track record in optimizing UI/UX, integrating payment systems, and leading frontend architecture. Adept in real-time apps, analytics, and CI/CD workflows.

EXPERIENCE

Senior Software Engineer (Gurugram, India)
Eco Led | Feb 2024 – April 2025

➜ Implemented **Mixpanel analytics** to track user journeys, including **login modals**, cart interactions, and **coupon application**, enabling targeted UX optimizations.

➜ Led frontend integration of **Razorpay** and **Stripe** in the checkout flow, reducing drop-offs by 18% and supporting UPI, cards, and wallets.

➜ Built a **Merchant Dashboard** for real-time inventory and order management, improving operational efficiency by **30%**.

➜ Managed version control and collaboration using **Bitbucket** coordinating **code reviews** and **feature merges**.

Software Engineer (Gurugram, India)
Eco Led | Feb 2022 – Jan 2024

➜ Built a **real-time shopping cart** with promo codes, dynamic shipping, and API integration — evolving early **MVP code** into a **robust production module**.

➜ Built responsive **product listing** and **detail pages** with dynamic content rendering and filtering logic.

➜ Created **reusable** form **components** and profile management UIs, improving code maintainability.

➜ Integrated **REST APIs** for **product, cart,** and **user data**, handled async loading and error states.

➜ Contributed to development of a **toast notification system** and **responsive navigation drawer**.

➜ Optimized frontend performance with **lazy loading**, **code splitting**, and **bundle analysis**.

Intern (Gurugram, India)
Eco Led | Aug 2021 – Jan 2022

➜ Helped implement **editable profile fields** with save/reset states and inline validation.

➜ Built a **toast/alert system** for success/error feedback using global context and animation logic.

➜ Created a **collapsible FAQ accordion** component with mobile-first styling and accessibility.

SKILLS

Frontend & Framework: React.js, Redux Toolkit, JavaScript (ES6+), TypeScript

Styling: Material-UI, Tailwind CSS, HTML5, CSS3.

Editor & Real-Time Tools: Monaco Editor, Socket.IO.

State Management: Context API, Zustand.

Build Tools: Vite, Webpack, Babel.

Testing: Jest, React Testing Library.

CI/CD & VCS: Git, Bitbucket, GitHub Actions, Jenkins.

APIs & Auth: REST APIs, Supabase Auth, Google OAuth.

Other: WebSockets.

PROJECTS

[Online Collaborative Code Editor](#)   [GitHub](#)
Real-time coding platform built with React, Monaco Editor, and Socket.IO

➜ Built a real-time code editor with **Monaco**, **React**, and **Socket.IO**, enabling **live editing**, **cursor sharing**, **theme/language switching**, and **fullscreen mode**. Integrated **Supabase auth**, **room routing**, and **guest access control**.

[Spotify Clone](#)   [GitHub](#)
➜ **Music player** using **React + Spotify API** with **search, playback, and routing.**

[Notes App](#)   [GitHub](#)
➜ **Rich-text** and **canvas-based notes** using **Quill.js** and **custom canvas editor**.
